WSI understands the enormous power of data. From uncovering new insights for plant productivity to optimizing process efficiency, WSI's proprietary software puts your data to work for you. We developed the Wash-Eye® system to provide real time, comprehensive information. Wash-Eye transforms your plant's potential into reality through precise and reliable data collection and analysis.

Whether your objective is solving a complex problem, keeping an eye on daily operations, or providing valuable reporting, Wash-Eye is your solution. This best-in-class data collection system will maximize both productivity and profitability. Our on-site team of data professionals provide around the clock support and updates, so you can trust that your data is accurate, protected, and accessible. At your plant, in the cloud, and on your device: Wash-Eye is always looking out for you.

WSI is transforming the cleaning industry, developing customized, smart solutions. A closer look at our products reveals leading-edge research and science, engineered to maximize quality while saving time, energy, and cost.

We hold ourselves to the highest standards, and are committed to doing the right thing for each other, for our planet, and for you—everyday.
